

SQL Queries vs. Tableau visualizations

Leah Gibbons & Elton Nichols

Without access to the full Tableau Desktop we were unable to link live data to Tableau. Instead we uploaded the .csv files for our MySQL database. Tableau Public does not let you directly download your .twbx file, but it does let you upload to the Tableau Public website, and [our Story is here](#).

We have also copied screenshots of the relevant data to this document. Our full project can be viewed at our [GitHub repo here](#).
